I authorize the Crematory to remove and dispose of handles, ornaments or other non-combustible parts of the cremation container or casket. **The Cremation Process.** I acknowledge the following: The human body burns with the casket, container, or other material in the cremation chamber. Some bone fragments are not combustible at the incineration temperature and, as a result, remain in the cremation chamber. During the cremation, the contents of the chamber may be moved to facilitate incineration. The chamber is composed of ceramic or other material which disintegrates slightly during each cremation and the product of that disintegration is commingled with the cremated remains. Nearly all of the contents of the cremation chamber, consisting of the cremated remains, disintegrated chamber material, and small amounts of residue from previous cremations, are removed together and crushed, pulverized, or ground to facilitate inurnment or scattering. Some residue remains in the cracks and uneven places of the chamber. Periodically, the accumulation of this residue is removed and interred in a dedicated cemetery property, or scattered at sea.

**Time of Cremation.** The cremation will take place after all required permits are obtained, this completed and signed Authorization is received by the Crematory, and after any scheduled funeral ceremony at which the decedent's body is to be present has been concluded. The Crematory will perform the cremation according to its schedule, and at its discretion, without obtaining any further authorizations or instructions, unless the right of the person signing this document to authorize the cremation is contested by someone. In that event the Crematory may delay the cremation while it determines whether and how to proceed.
